Education

University of Ottawa Sep 2022 – Dec 2026
Honours Bachelor of Science in Computer Science *Ottawa, ON*
Relevant Courses: Databases, Data Structures, Operating Systems, UI/UX Design
Awards: Scholarship for Women in CS, UOSU Outstanding Time Commitment Scholarship, Ted Rogers Scholarship

Experience

Global Customer Care Business Intelligence Intern Jan 2026 – Aug 2026
Ciena *Ottawa, ON*
- Led reporting and analytics across 5+ case-auditing areas, translating operational data into insights that supported operational performance monitoring and surfaced process improvement opportunities for management
- Built *Power BI* dashboards and validated key performance metrics across *Excel*, *Power BI*, and *Salesforce*, improving reporting accuracy and consistency and giving stakeholders reliable, trusted data for confident decision-making
- Streamlined reporting and manual request processes by building *Power Automate* workflows and improving request management for report creation and refinement through *Freshdesk*, reducing manual effort and improving tracking

RPA Intern Jan 2025 – Apr 2025
Scotiabank *Ottawa, ON*
- Monitored 55+ *Blue Prism* robotic process automation workflows to support operational reliability, proactively identifying workflow issues and flagging them so automated processes keep running smoothly and reliably
- Documented automation logic and business processes, enabling smoother knowledge transfer and faster onboarding

Machine Vision Technical Writer Intern Sep 2024 – Dec 2024
Zebra Technologies *Remote*
- Developed and refined 100+ pages of technical documentation in *Oxygen XML Editor*, collaborating closely with developers to update user guides and function references for the Aurora Imaging Library, applying C expertise

Skills

Analytics & Reporting: Power BI, Excel, Tableau, SQL, Salesforce, Python, R
Operations & Process Improvement: Power Automate, Blue Prism (RPA), Freshdesk, JIRA, Agile/Scrum, Documentation
Technical: Java, JavaScript, TypeScript, C, React, Next.js, Flask, PostgreSQL, MongoDB, AWS, Docker, Figma

Projects

Honours Project: Robotic Manipulation of Granular Materials | *Python, PyTorch, Reinforcement Learning* Dec 2025
- Collaborated with the University of Toronto to implement and train the RLPD reinforcement learning method for robotic manipulation of granular materials, evaluating results across simulated environments and training runs
- Built a SAC training and evaluation framework using Gymnasium and PyTorch, ran hyperparameter comparisons, and analyzed task variance across AntMaze, Hopper-v4, and Walker2d-v4 to compare model performance

Hotel Management System | *Java, SQL, HTML, CSS* Apr 2024
- Built an e-hotel web application with a relational database supporting role-based administrative actions; designed the relational schema and ER diagram, assisted with frontend design, and tested the database for correctness

UI/UX Design Case Studies | *React, JavaScript, CSS, Figma, Vercel* Jul 2025
- Developed four interactive websites focused on user flow, accessibility, and responsive, user-centered design, with bilingual and theme-adaptive features to enhance user experience across devices, deployed through Vercel

Leadership & Activities

VP Philanthropy Mar 2023 – Apr 2026
Computer Science Student Association – University of Ottawa *Ottawa, ON*
- Planned and hosted fundraising events with faculty organizations, raising hundreds of dollars for a variety of causes

Marketing/Design & Sponsorship Coordinator Jul 2023 – Jan 2025
uOttaHack – University of Ottawa *Ottawa, ON*
- Supported hackathon operations through marketing, design, and sponsor outreach for successful event execution
